Strategy

<i>Vacation of a team member</i>	Review the roadmap, ask another employee for part-time work	Mitigate
<i>A team member decides to quit</i>	Review the roadmap, add another employee, if possible, open the new position	Mitigate
<i>Suppliers rejected to work with us (if there are suppliers)</i>	Agree on some time until we find another one, start searching for another supplier, review how it affects product, think about a workaround with the dependent features	Avoid
<i>Bad feedback about the product</i>	Answer user feedback, fix problem, reward a person, who found an issue	Mitigate
<i>Created architecture is not scalable when developing a product</i>	Review current architecture and how it should be changed, add changes to roadmap before scaling	Escalate
<i>Risk of security breaches</i>	Don't give every employee access to every system and piece of data.	Avoid
